INDEX TO PRINCIPAL CONTENTS OF VOLUME 169

JANUARY TO DECEMBER 1984

(First figure indicates issue, second indicates page)

A

Annual industry review and outlook . . 1/9-11
Adjacent fabrics in colour fastness testing 4/9
Automation in the modern dyehouse . . 4/13
Another company returns to coal . . . 4/5
Aqueous systems still favourite? . 8/9-13 & 19
A new name in dyes and chemicals . . 9/7
Air Float system commercialised . . . 9/7
Automatic fabric roll packaging and inspection 9/36
Agents for German equipment . . . 10/7-8
Addition to pumps range 10/24
Are disperse dyes really identical? . . . 12/8

B

Burmese finishing industry modernisation 2/8
Boost for US machinery show 5/16
Bayer's new home 5/7
Beware of cuts in R+D says institute chief 7/6
Bordeaux shades on cotton 7/19
Bicentenary of calender pioneers . . . 9/6
Bentley chief becomes new chairman of BTMA 9/6
Back-end automation of carpet coaters* 9/44-47
Boiler cleaning powder 11/30
Big benefits the aim of YCL reorganisation 12/6

C

Changes in jet dyeing system 3/39
Colour measurement breakthrough earns award 5/5
Colouration systems – 'Buyer beware' 5/41-43
CTC's formula for success 7/7
Cleaning jet information 7/9
Commercial aspects and selection bleaching 7/17-19
Celebrating 25 years in the industry . . 9/8
Colour specifying, compounding, monitoring 9/17-20
China's major moves on technology advances 11/5
Chemical auxiliaries group spearhead ICI push 12/5
Courtaulds benefit from increased prices 12/7

D

Dyesprings register on computer . . . 1/5
Detecting a little harmful air 1/24
Dyer's Library 1/32, 2/32, 3/32, 4/31
Dielectric dyeing – a new British development 2/13
Dyeing delicate fabrics 2/21
Drum dryer introduced 2/27
Dyehouse handling, storage and warehousing feature 4/13-25
Dyehouse handling and packaging . . . 4/19
Development in dye-cycle controllers . . 4/21
Dyers play host to the stars 5/6
Drew relocates 6/7
Death of former technical director of Longclose 8/7
Dyehouse equipment review 9/17-32
Dyeing control 9/20
Dyehouse services, water and effluent treatment 10/23-25

E

Ever-higher levels of automation . . . 1/19
Energy-saving in drying 1/24
Ellis Jones move out of leather 2/7
Economies in wet processing 2/28
Efficient drying and chlorination 3/24
Expansion by belt makers 5/7
Energy conservation equipment . . . 9/7
Extension at Ilkley 9/8
Economic finishing: the 'Low Leave On' vacuum system 10/17, 20, 21, 27
Energy blueprint will go to all finishers . 11/5
Enhanced dyeing claimed for dyebath control system 12/18-20

F

Fabric process control 1/27
Focus on a company – Hoechst 3/17
Formaldehyde in textile finishing . . . 3/23
Future demands of dyeing machinery . . 3/33
Foam and low add-on finishing methods 5/17-31
Foam printing of textiles 5/23-31
Factory fashion forecast is brighter . . . 7/5
Fabric evaluation for textiles and clothing 8/8 & 22
Foam printing by the Stork technique . 8/15-19
Faster thread drying cuts labour, floorspace 9/5
Fibre and yarn dyeing 9/20
Fabric dyeing 9/20-24
Far East sales underline strength of UK dyeing machinery makers . . . 10/14-15
Fast growth for UK suppliers 11/6
Flexible approach pays off for the 'New' Mather 11/31

G

Guild announce key dates 9/8
German chemical company celebrates centenary of progress 7/8-9
Guild of Technical Dyers plan one-class membership and no 'Friendly Society' status 7/11
Gaston County buy stake in the carpet sector 8/6
. . . and start machine building in the UK . 8/6

H

Hoechst man is Chamber's new president 7/7
How indigo manufacture came to the UK 9/47
Guide to new dyestuffs 12/25-28
Guide to new auxiliaries 12/28-35

I

Industry must be ready to change to meet customers' needs 1/10
Instruments, controls and computers feature 1/19-29
Industry Minister's advice to finishing sector 2/5
ICI and Alliance join forces 2/5
Jiggers suitable for all fabrics 2/27
Improved process control 'key to future' . 3/5
International Dyer/Kirstol post-ITMA seminar 3/7, 4/27
Improving wool chlorination 4/26
International seminar focusses on quality 5/6
International Dyer/Kirstol post ITMA seminar 5/27-31
Inovative use of dyes 5/34-35
Italian directory 5/35
ICI Fibres extend team 5/37
International colourists' congress hosted by SDC 7/7
Improving carpet finishing operations . 7/21
Integrated computer control is WIRA aim . 9/33
Innovations in tubular knits mercerising and combined drying and finishing . 10/12-13
IFATCC in London – a special report 11/15/16/18/19/20
IFATCC in London – a special report Part Two . . . . . .12/13-15 & 17

K

Keeping costs down by preventing build-up of scale in hard water 10/23

L

Leather-trade use match prediction system 2/6
Laboratory dyeing equipment 5/35
1984 starts well for Laporte 7/6
Leeds Group's good results 7/13
Lower-cost seam detector for piece dyeing 9/21
Latest equipment from four European machine makers 11/32-33

M

Many developments from MCS 2/23
Magin Group safeguards Trofix technology 6/6
Modern colour kitchens for carpet dyeing and printing 6/20-21
More members for SDC in centenary year 7/5
Macbeth restructures 7/9
Massive print colour yield increase claimed 9/6
Merger of chemical firms 9/8
Major jet dyeing installation with electronic control 9/32
Massive re-equipment planned by Chinese 10/5-6
Massive dyesprings shipment en route to USSR 11/7

N

No report on chrysoidine 1/31
New technology polymer-coated rotary printing screen 3/27
New officers of Guild 5/6
New answer to stenter lubrication difficulties 5/32-33
New edition of safety booklet 5/36
New shade passing service from Wira . . 6/5-6
New fashion centre 7/5-6
New manager for Sandoz dyes division . 8/7
New branch office in USA 9/7
New dye jig with microprocessor control . 9/29
No pick-up in UK's finishing sector . . . 10/5
New pattern cards 10/27
NZ wool colouring lead extended . . . 12/6

O

On-line removal of boiler deposits . . . 11/28

P

Personal computer ACS colour control system 1/27
Prospects bright for Scottish companies . 2/6
Positive lead in colour forecasting for cotton users 2/7
Pigments business acquisition 5/7
Praise for dyers and colourists 6/7
Problems in processing cotton knit-goods 6/18-26
Profitability pegged by accelerating imports 8/6-7
Pozzi dyeing technique modified for tow and top processing 9/33
Planners' blight 10/1
'Product excitement' the key – McPhee . 10/6
PU-coated fabric growth: new UK firm . 10/8
Pump for corrosive and abrasive liquids . 10/24
Purpose-built mixers for big powder batches 10/25
Programmable furnaces 11/30
Patents
Washing without tension (GB2,009,268B) 1/31
Alkali treatment of cloth (GB2,009,367B) . 4/30

R

Reactive dyes and the peroxide problem . 3/11
Reactive dyes for wool 3/29
Radio-frequency drying now fully recognised 6/5
Radio-frequency drying 7/22-27

Rope dyeing on jet and/or overflow machines: one long rope or several short lengths? 8/23
Recovery by-passes UK finishers – ICC Report 9/5-6
Recovery in traditional textile activities . 9/34
Raising equipment for Courtaulds group fabric printer 9/35
Recovering heat from liquid effluents . . 10/25

S

Switch to coal will save £18,000 a year . . 1/5
Swiss chemical firms confident 2/5
Steam-raising problems solved 2/19
Shrinking range for Canadian company . 4/5
Success for new drying system 5/5
Symposium on printing 5/6
Self-contained chemicals operation . . 5/7
Shirley Developments name managing director 5/37
Sandolan MF dyes – a new answer to old problems in the dyeing of wool and wool blend carpet yarns 5/38-40
SDC centenary dinner 5/40
Springing to export success 6/6
Screens supreme into the nineties . . 6/13-17
Steam injection noise in dye vats part I . 6/27-29
Stockbrokers' prediction 7/15
Steam injection noise in dye vats part II 8/20-22
Shirley's latest courses 10/7
Swiss machine makers celebrate 125 years 10/16
Specialist evaluation of water cooling/filtration 10/25
Symposium on wool wet processing . 11/6/20
Swiss complete rapid contract 11/7
Steam raising and boilerhouse equipment 11/21/26

T

Three directors for BTEA in major re-organisation 1/6
The star-gazer's view is–cautious optimism 1/9
The creation of Novatron – a disperse dyeable polypropylene fibre 2/30
Transfer printing press for carpet tiles . . 3/24
Technical information and ability to invest wisely hold key to the future 3/7
The dangers of paper mountains . . . 4/17
The latest equipment reviewed . . . 5/17-21
Traditional Scottish dyestuffs identified . 5/36
Taiwan textile industry to expand . . . 6/5
The risks of high pressure dyeing . . . 6/6
Textiles in the consumer society – the finishing industry's response to the challenge 6/30-33
The two billion metre competition . . . 8/5
'Total management of colour' is ICS goal . 8/5-6
Textile chemicals merger in Germany . . 9/6
Two important UK matching installations 9/35-36
The systematic approach to wool dyeing 9/37-43
Tomlinsons 10/5
Taiwan still the USA's major imports 'bogey' 10/6
The sixteen million colour palette . . . 10/8
Technology breakthrough earns Queen's Award for colour specialists 10/11
Twin-bed demineraliser seen as 'considerable advance in design' 10/23-24
Tootal still depend on threads 11/8
Textile printers 'halve fuel bills' in switch to coal boilers 11/27/28
'Total system capability' at Texicon's new HQ 12/5-6

U

US firm's colour control systems . . . 10/7
UK-born American's award 11/5-6
UK dyer benefits from Govt. project . . 11/7
Using the 'packaged' type boiler in the textile dyehouse 11/29/30

W

Where do we stand on flammability? . . 1/30
Wool scientists develop lustrous yarns for knitwear 4/26
Womenswear marketing at IWS 5/37
Wira test house appointment 7/20
Wira research yarn dyeing 9/8
West German/Chinese 'co-production' deal 12/5

Y

Yorkshire Chemicals at turning point . . 10/9

INDEX TO MAIN SUBJECT HEADINGS

Auxiliaries 10/27;12/28-35

Bleaching 7/17-19

Carpets 2/30; 8/9-19; 9/44-47

Coating equipment 9/44-47; 10/8

Company profile 10/11-16

Dyehouse services 4/13-25
(incl. energy saving, warehousing, boiler-house services)

Dyeing . . . . 4/29; 5/38-40; 6/20-21; 8/23; 9/29-33 and 37-43; 10/7, and 14-15; 11/15-19; 12/13-17

Dyestuffs . . . . . 1/31; 3/11, and 29; 9/47; 10/27; 11/15-19; 12/25-28

Drying 7/22-27

Drying and finishing combined 10/12/13

Finishing 1/30; 4/26; 5/32; 6/30-33; 7/21; 9/35-36; 10/17,20,21,27

Foam finishing 5/17-25

Industry 1/9-11; 2/5; 3/13-25; 10/1

Instruments, controls and computers 1/19-29; 5/41;43

Machinery . . . . . 2/12-28; 9/35-36 and 44-47; 10/14-16; 11/31-33

Patents 1/31; 4/30

Printing 6/13-26; 8/15-19; 11/27-28

Processing 6/18-26
